Juan José Barrera Upegui

Junior C# Full-Stack Developer

Medellín, Colombia +57 324 493 7254 juanjoseb9805@gmail.com LinkedIn GitHub Portfolio

PROFESSIONAL SUMMARY

Bilingual Junior C# Full-Stack Developer with a strong UX/UI sensibility, proficient in Angular.js, .NET/C#, and REST APIs. Experienced in translating business requirements into user-centered digital solutions. Fast learner with hands-on internship experience in agile teams and a solid foundation in both frontend architecture and backend development.

TECHNICAL SKILLS

FRONTEND HTML5 | CSS3 | JavaScript | TypeScript | Angular.js

BACKEND .NET / C# | REST APIs | SQL

DATABASES PostgreSQL | MongoDB

TOOLS & PRACTICES Git | GitHub | Agile/Scrum

DEVOPS & INFRASTRUCTURE Docker | Docker Compose | Nginx | Linux

PROFESSIONAL EXPERIENCE

Angular Developer
May 2024 – Aug 2024

ONCREDIT

Medellín, Colombia

- Collaborated with UX/UI team to translate business requirements into user-centered digital solutions, improving requirement clarity and accelerating development cycles
- Gathered user and stakeholder feedback to craft clear, actionable user stories that enhanced sprint planning and feature prioritization
- Contributed to interface design and component development, strengthening alignment between business needs and customer experience

Systems Practitioner
Sep 2023 – Feb 2024

Vivell SAS

Medellín, Colombia

- Provided Level 1 technical support and collaborated with the development team on interface improvements
- Configured reverse proxy servers (Nginx) and managed Linux server basics for application deployment
- Contributed to continuous UI/UX enhancement initiatives, boosting user satisfaction and platform adoption

Junior Business Analyst
Jan 2023 – Jun 2023

Palm IT

Medellín, Colombia

- Presented internal product focused on inventory system optimization to stakeholders, demonstrating technical and communication skills
- Bridged technical and business teams to define clear requirements and ensure successful solution delivery

KEY PROJECTS

Full-Stack Web Application

Angular.js · .NET / C# · PostgreSQL · Docker

Personal full-stack learning project demonstrating proficiency across frontend and backend technologies. Built a functional application using Angular.js for the frontend interface and .NET/C# for REST API development, combined with PostgreSQL for data persistence. Containerized the entire application stack using Docker and Docker Compose for consistent development and deployment environments. This project showcases the ability to architect and implement complete solutions from database design through user interface and production-ready deployment.
